## EDUCATION

**State University of Paraíba (UEPB)** Sep. 2026 – Present
*B.S. in Computer Science* *Patos, Brazil*

*Relevant Coursework:* Algorithms, Discrete Mathematics, Introduction to Computing.

## PROJECTS

**Gesture Studio** 2026
*Personal Project | Electron, React, MediaPipe, Node.js*

- Developed a desktop application that enables computer control through hand gestures using Electron, React, and computer vision.
- Integrated MediaPipe Hands for hand tracking and implemented gesture-to-shortcut mapping, with local persistence of user configurations.
- Integrated the application with the operating system to execute commands and keyboard shortcuts, turning gesture recognition into a practical desktop automation tool.
- GitHub: source code and documentation.

**Inventory and Sales Management System** 2026
*Personal Project | Node.js, Express, MongoDB, React*

- Developed a REST API to centralize product, category, sales, and inventory movement management for a flower shop.
- Implemented JWT-based authentication and role-based authorization to restrict operations according to each user's permissions.
- Structured the backend using Node.js, Express, and MongoDB, providing API resources for integration with a React frontend.

**Taskly** 2026
*Personal Project | Node.js, Express, MongoDB, React*

- Developed a task management application with full create, read, update, and delete (CRUD) functionality, associating each task with its respective user account.
- Implemented authentication and protected routes to restrict access to application resources to authenticated users.
- Enforced user-level data isolation, ensuring that each account can access and manage only its own task records.

## TECHNICAL SKILLS

**Programming Languages:** JavaScript, TypeScript, Python, SQL

**Backend Development:** Node.js, Express.js, REST APIs, authentication, authorization

**Frontend Development:** React, HTML, CSS, Vite

**Databases:** MongoDB, Mongoose, SQL

**Tools and Environments:** Git, GitHub, Docker, Linux

## ADDITIONAL INFORMATION

**Languages:** Portuguese (Native); English (B2)

**Interests:** Software Engineering, Backend Development, Algorithms, Data Structures, Computer Vision
